## About the Conference

This conference aims to bring together researchers from the academia and practitioners from the industry in order to expose to limelight the advanced techniques in computing. The main focus of the conference is to bring out high quality papers related to the various theories and practical applications in computing. Furthermore, we expect that the conference and its publications will be a trigger for future research and technology developments in this theme. This Conference will be a platform for the participants to know about the recent advancements in the field of Computer Science

Topics of interest for submission include, but are not limited to:

Mobile Computing  
Green Computing  
Cloud Computing  
Grid Computing  
Pervasive Computing  
Bioinformatics  
Data Mining  
Next Generation Networks  
Bio medical Engineering  
Image Processing  
Multimedia  
Network Security  
Internet Technologies & Algorithms
