# **A Report on “Online STUDENTS INDUCTION PROGRAM”**

**2020-2021**

**(First Year Batch: 2020 - 2024)**

**23.11.2020 to 01.12.2020**

## **Key Note**

At first, I thank our management and our principal Dr.S.R.Kannan, for granting permission to conduct the online student Induction program.

Transition from school to college life is one of the most challenging events in a students' life. When new students enter an institution, they come with diverse thoughts, backgrounds and preparations. They come into a new unfamiliar environment, and many of them have little knowledge of a university/college. An important task, therefore, is to welcome new students to Higher Education and prepare them for their new role. Due to Covid'19 situation as per AICTE guidelines, Students induction program conducted from 23.11.2020 to 01.12.2020 through online platform for all the first year students (Batch:2020-2024) of Sriram engineering college who all are admitted in academic year 2020-2021 and covered SIP module 1-9.

The screenshot shows a Google Meet window with the title 'Lakshmi AP-ECE is presenting'. The main content is a presentation slide titled '5 Essential Qualities Of Good Literature'. The slide text reads: 'Literature should have a theme', 'When coming up with any literary work, it's very essential to have a theme because this is what gives your writing direction.', and 'From start to finish, your work should be linked to the overall theme meaning that whatever different issues you choose to address through your work must all contribute towards the broad theme.' The right sidebar shows 14 people in the call, including Vignesh AP - Auto (You), divya r, Lakshmi AP-ECE, and Mrs. I. Dhana Bharathi A..

The screenshot shows a Google Meet window with the title 'Lakshmi AP-ECE is presenting'. The main content is a presentation slide with text about radiation and space exploration. The text includes: 'Just muscle comes lost strength, which makes it more difficult for astronauts to complete important tasks while in space.', 'Another very serious concern is exposure to radiation because the protection of the Earth's atmosphere is gone. As on this planet, too much radiation can cause radiation poisoning and cancer. Time spent away from levelled mass and the stress of a high-pressure job with no escape can also cause negative psychological effects. These issues are made worse if an astronaut is not getting enough sleep or if they are having problems with other mission members (Babcock, 2015). And, again, with longer flights, these problems will increase. With current technology, the human body could not withstand a trip to another inhabitable planet.', and 'Looking to the future: Science fiction has become a reality. New advances are being made all the time. Scientists are experimenting with the idea of a solar sail, which would propel the rocket forward during the entire journey. Since there is nothing to stop a ship in space the sail remains, this will allow it to accelerate the entire time, then building up an incredible speed.' The right sidebar shows 15 people in the call, including Gopi Gopi, Lakshmi AP-ECE, and saramya, M Asst. Prof / ...

The screenshot shows a Google Meet window with the title 'Alexander joseph is presenting'. The main content is a presentation slide titled 'GRATITUDE'.
